Easier, Customized, Adjustable for Optimal Comfort

Immediate Fit **Transtibial** Prosthesis: Fully Adjustable for Optimal Comfort and Versatile Use

The original immediate fit, fully adjustable transtibial prosthesis. It uses the buckle closure and has both right and left handed configurations with the buckle on the outside, but can also be worn with the buckle on the inside. Easily accommodates limb volume changes.
TT200 & TT250 - Available in various sizes

Introducing our latest innovations: New options for adults and children

A sleek and cutting-edge system designed to give users unlimited adjustment any time and anywhere. This prosthesis is for persons that would fit into our standard TT200 prosthesis or smaller. It is lighter and lower profile to better fit under clothing. The three distinct lengths accommodate most patients.
TTAC-S

A modern and innovative system to adapt to children and teens as they grow. Also works for small adults. For patients with symes amputations, a custom socket is made to accommodate the length and bulbous end.
TTAC-N
